Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Duplicate Claims

Applicant is advised that should claim 3 be found allowable, claim 4 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

((e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 3 is rejected under 35 U.S.C. 102(e) as being anticipated by Chang et al. (US 2002/0017399 A1), hereinafter Chang.

Regarding claim 3, Chang discloses, in figure 8 and in paragraph [0050], a method of production of a semi-conductor package mounting a capacitor for

suppressing fluctuation of a power supply voltage, comprising: providing an attachment hole (in figure 8, between L3 and L6) passing through a board (800) in a thickness direction and press fitting into the attachment hole a capacitor cable comprised of a conductor wire (612) at the core, a high dielectric constant material (608) coaxially covering the conductor wire at a predetermined thickness, and a conductor sheath (606) covering the out circumference of the high dielectric constant material so as to attach the capacitor to the board.

Claim 4 is rejected under 35 U.S.C. 102(e) as being anticipated by Chang.

Regarding claim 4, Chang discloses, in figure 8 and in paragraph [0050], a method of production of a semi-conductor package mounting a capacitor for suppressing fluctuation of a power supply voltage comprising: providing an attachment hole (in figure 8, between L3 and L6) passing through a board (800) in a thickness direction, forming a conductor layer (606) at an inner wall of the attachment hole, and, press fitting into the attachment hole formed with the conductor layer a capacitor cable comprised of a conductor wire (612) at the core and a high dielectric constant material (608) coaxially covering the conductor wire at a predetermined thickness so as to attach the capacitor to the board.
